Environmental Plan

The purpose of this plan is to develop an environmentally sensitive library organization that will model best practices for the patrons of **The Public Library** in compliance with the Green Governments Illinois Act. The plan goals are to assess current practices, revise facilities and behaviors within the limitations of available resources, and to educate and provide resources for the served community in the process. The Board of Trustees and the Library Director will conduct an annual survey of the library practices to shape the management of environmental resources using real data for benchmarks and evaluation.
